DETAILED ACTION

Information Disclosure Statement

- This office acknowledge receipt of the following items from the Applicant:
 Information Disclosure Statement (IDS) filed on September 10, 2004.
- 2. Information disclosed and list on PTO 1449 was considered.

Drawings

3. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

4. Claims 37-43 are objected to because of the following informalities:

In claim 37: the term "he method" should be -- The method--.

In claims 38-39: the term "3he method" should be -- The method--.

In claims 40-43: the term "4he method" should be -- The method--.

Appropriate correction is required.

Application/Control Number: 10/065,921

Art Unit: 2824

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 6. Claims 1-43 are rejected under 35 U.S.C. 102(e) as being anticipated by Roehr et al. (US. 2004/0057275 A1).

Roehr et al. disclose in Figures 3 and 4, a method of operating memory array comprising: providing a memory array including a plurality ferroelectric memory cells arranged in a plurality of columns and interconnected by wordlines (304 or WL), bitlines (BL, /BL or 407a-b), and platelines (306a-b or 406a-b), a column comprises a bitline pair having first and second bitlines (407a and 407b of fig. 4) coupled to a sense amplifier (409 and see paragraph [0017]); performing a memory access (read or write access) to the array, the access selects one of the columns of the memory cells (see paragraph [0020]); and a plateline decoder (see lines 9-12 of paragraph [0016]) providing a plateline pulse to the selected column (see paragraph [0004]), wherein the plateline pulse is equal to logic 1 or logic 0 (see paragraph [0006]).

Roehr et al. further disclose the memory cells being arranged in an open bitline or a folded bitline (figs 3, 4 and see paragraphs [0015], [0021]); unselected bitlines being set to a define state as logic 1 or logic 0 or a reference voltage which is equal about Vdd/2

Application/Control Number: 10/065,921

Art Unit: 2824

(see figs. 2, 5 and paragraphs [0007], [0023]), wherein the unselected bitlines are floated as isolating them from the sense amplifier by transistors (432 a-b of fig. 4). Also, Fig. 4 discloses the memory access select x columns of memory cell where x is greater than 1, and n adjacent columns of the selected column being unselected where n is equal to at least 1 (see fig. 4 and paragraphs [0017]-[0018]); platelines pulsing to the x selected columns (see paragraph [0019]).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hoya et al. (U.S. 6,493,251), Koo (U.S. 6,236,588), Ashikaga (U.S. 6,411,540), Komatsuzaki (U.S. 6,574,135), Takeuchi et al. (U.S. 6,366,490), Honigschmid et al. (U.S. 2002/0054501), Ihara (U.S. 5,517,446) disclose an integrated circuit similar to that of Roehr et al.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan Le whose telephone number is (571) 272-1872. The examiner can normally be reached on M-F (8.00AM - 5.30PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on (571) 272-1869. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
